Thirty - Sixth Year

Martin, Tennessee, Thursday, December 3, 1964

Number 9

Dr. Glen Hall (right) was on campus Wednesday along with Dr. John A. Ewing (left) director of the U-T Experiment Station, to confer with Dr. Paul Meek (center) on the new program in agriculture at U-T Martin Branch. Dr. Hall will head agriculture here Jan. 1, 1965.

Dr. Glen Hall Visits Campus To Reorganize Ag Program

Dr. O. Glen Hall and Dr. John A. Ewing were on U-T Martin Branch campus December 2 to discuss changes with Vice President Paul Meek and others concerning the new program for UTMB's Agriculture Department.

Dr. Hall, who will take the position as head of the department in January, and Dr. Ewing, director of the U-T Agriculture Experiment Station, met with the UTMB agriculture staff. In the meeting, the next step in the academic program was determined, and the staff members approved the proposed course changes.

Dr. Hall stated, "We are making progress on the new curriculum and if everything works out the changes will go into effect September, 1965."

Also, Dr. Hall and Dr. Ewing conferred with Gene Stanford, UTMB business manager, on the agriculture budget which will be adjusted under the new program for the UTMB Department of Agriculture for the last half of the school year. This budget will pave the way for the 1965-66 budget to be planned in April.

The emerging plan for the UTMB farm to be operated as an experiment station under Dr. Ewing's direction was discussed. The farm's primary objectives will be to point toward laboratory instruction for the student and toward experimental work with crops and livestock. A new accounting system being established for farm income by Brodie Baynes, U-T auditor, and Mr. Stanford. "We feel that the proposed curriculum has considerable flexibility and will permit agriculture students to prepare for the many very fine opportunities that are available in the dynamic field of agriculture," said Dr. Hall.

Page And Teuton Have Close Shave

Grover Page, assistant football coach at The University of Tennessee Martin Branch, and Bill Teuton, executive vice president of the Weakley County Chamber of Commerce, narrowly escaped drowning Saturday morning when their boat overturned in the Kentucky Lake near Springville pump house.

The two men were returning from duck hunting and for some unknown reason the Reelfoot-type boat capsized.

The two heavily clad men were rescued by two 11-year old Dresden lads who are Boy Scouts and have had many hours of experience on the lake.

The young heroes, Gwin Anderson and Roy Herron, had just finished taking the motor-equipped boat out to the lake, when they saw the Page-Teuton boat flip over.

Faculty Members Attend Knoxville Meet On Teaching

Dr. Norman Campbell, dean of instruction at The University of Tennessee Martin Branch, professors H.B. Smith and Paul Foote, are attending the state's first "Conference on Improving Arrangements for Learning in Tennessee Colleges and Universities" at U-T Knoxville, December 3-5.

University and college professors from throughout Tennessee will join in what has been termed a unique conference aimed at improvement of the teaching effectiveness in higher education. This is probably the first meeting of its kind in the nation.

Two national leaders of education will be speakers at this conference. Dr. John D. Millett, director and chancellor of the Ohio Board of Regents, and Dr. Stanford C. Erickson, director of the Center for Research on Learning and Teaching at The University of Michigan, will discuss the theme of the conference.

Dr. Millett will speak this afternoon on the subject "Crucial Issues in Teaching Improvement."

Dr. Erickson, also a professor of psychology at Michigan, will speak at the Saturday morning session on the subject "Problems to be Faced in Improving Teaching on Your Own Campus and Possible Strategies."

Chorus To Present 'Messiah' Sunday Afternoon At Gym

The 75-voice chorus of the University of Tennessee Martin Branch will give its annual presentation of Handel's "THE MESSIAH" Sunday afternoon at 3 o'clock in the Women's Gymnasium.

The UTMB chorus is under the direction of Miss Harriet Fulton, head of the Music Section. Robert Stewart, UTMB assistant professor of piano, will serve as accompanist.

Choral and solo excerpts from all three parts of "THE MESSIAH" will be presented. Student soloists will be Peggy

Holidays To Begin On December 17

Christmas holidays preceded by study day and finals examinations will mark the end of fall quarter at The University of Tennessee Martin Branch.

Study day, a first at UTMB, has been set for Wednesday, December 9, immediately following last class day. Examinations will be given December 10 to December 16, ending at 5 o'clock on the latter date.

Christmas holidays begin for students Thursday, December 17, and will continue to Monday, January 4, 1965, upon which day registration for winter quarter will be conducted. Classes will begin on Tuesday, January 5.

Judging Contest To Be Held Here

The West Tennessee Future Farmers of America Livestock and Dairy Judging Contest will be held here Saturday, December 5.

Approximately 600 students from all Vocational Agriculture Departments in West Tennessee will participate in the contest.

James Hall, supervisor for the Vocational Agricultural Department, will be in charge of the contest sponsored by the FFA Foundation, Inc. and the Tennessee Association FFA.

UTMB agricultural staff members, Earl Knepp, Dr. Paul Starks, and E.W. Culvahouse, FFA advisor at Martin High School, Tom Stuart, will be in charge of local arrangements.

The UTMB farm will furnish most of the livestock for the contest. Mac Burrows, South Fulton, will furnish one class of dairy animals and Parnell Garrigan, Union City, will furnish one or more classes of swine and beef animals.

Smith, senior from Martin; Kathy Brown, sophomore from Trenton; Brenda Lovell, freshman from Humboldt; Sherry Stutts, freshman from Dyersburg; Ronald Pratt, junior from Decaturville, and Ross Via, junior from Bells.

The brass choir, under the direction of Glenn Wiesner, instructor in instrumental music, will present a group of Christmas carols preceding the oratorio.

The program is open to the public and no admission charge will be made.

Architects Near Agreement On Student Center Design

Architects are nearing agreement on the design for the new student center at The University of Tennessee Martin Branch, Dr. Paul Meek, vice president, said yesterday.

As was reported in the February 18, 1964 edition of The Volette, "To make the building possible, the U-T Board of Trustees authorized the administration to apply for a 40-year loan which would be repaid by cafeteria profits plus a special new student activity fee of \$8 per quarter."

Board And Room Increases Coming To UTMB In 1965

Increases in room and board at The University of Tennessee Martin Branch have been recommended to the U-T administration for the 1965-66 school year, Dr. Paul Meek, vice president, said yesterday.

The purpose of the increases is to reorient UTMB's financial structure to provide for the retirement of debt on buildings already in use, others that are under construction, or are to be constructed in the near future.

The residence hall for men now under construction which when completed will have connecting baths between each pair of rooms and will be air-conditioned will rent for \$90 per quarter. The men's Main Residence Hall will be increased to \$70 from the present \$65. Room rent in the old residence halls will remain at \$50. Basement rooms will be increased to \$45 from \$40.

Schedule of rates for the Women's Residence Hall will be as follows: new wing, air-conditioned unit, increased to \$80 from \$70; regular rooms in the north wing, \$70 from \$65; basement rooms, \$45 from \$40.

Board by quarters will be as follows: fall quarter, increased to \$125 from \$120; winter, \$115 from \$110, and spring, \$115 from \$110.

Fees are recommended to remain at the same rates. Present out-of-state tuition of \$150 has been recommended in accordance with action taken recently by the U-T Board of Trustees.

Miss UTMB Title To Be Discussed By ASA On Dec. 8

The questions of big name entertainment at The University of Tennessee Martin Branch and who should bear the title of "Miss UTMB" are on the agenda of the meeting of the All Students Association December 8.

It will be discussed whether the winner of the campus leader election shall have the title of "Miss UTMB" or whether the winner of the beauty review shall have the title.

In previous years, the co-ed who was elected as campus leader had the title of "Miss UTMB" and the person who won the beauty review had the same title. These questions will arise before the ASA Council as to whether or not to change the title of one of the honors.

Under the leadership of Larry Bates, ASA president, there will also be a discussion on the revision of the constitution and on the revision of the structure of the student government.

All ASA representatives are urged to attend the meeting in the ASA Room of the Old Science Building at 7 p.m., December 8.

"To make the building possible, the U-T Board of Trustees authorized the administration to apply for a 40-year loan which would be repaid by cafeteria profits plus a special new student activity fee of \$8 per quarter."

It was further stated, "UTMB students already have a \$7 activity fee which pays for tickets for athletics and theatrical events, in part for student publication and other activities. The additional student fee which will not take effect until the new building is completed will raise student activity cost to \$15 per quarter." This timing could be modified later by action of the Board of Trustees, Dr. Meek said.

In the February 25, 1964, edition of The Volette, a story written under the by-line of Margaret Fisher (present Volette editor) who after interviewing a number of students reported that campus opinion generally was favorable to securing the student center by this method of financing.

In the March 3, 1964, edition of The Volette, it was reported in the lead story on the front page that the student center was discussed in a joint ASA-faculty committee meeting. The purpose of this joint committee was to represent the student body. Members of the group discussed some of the facilities which they felt were needed in the center. At the top of the list were a ballroom and banquet room. Other suggestions included a cafeteria, snack-bar and a number of other facilities.

Dr. Meek said yesterday that the means of financing the center, now under consideration, will make it possible to have the facility ready for use by 1966 instead of postponing the building of it for a number of years and even then having to face the same problem. A delay in starting the student center has been experienced because of disagreement on enrollment and projected enrollments. This means that agreement with the federal lending agency, having been reached, will result in the expansion of the original plans by \$300,000 for a total of \$1,100,000.

It has been determined by the university administration that a student center at UTMB holds a position of the highest priority. Students and the U-T administration seem to be in accord. It is expected that another session of the joint ASA-faculty committee will be held soon to reach final decisions on a number of items related to the building of the student center.

One facility to be included in the student center is a 400-unit cafeteria that will accommodate approximately 1000 students per meal. Also included in the planning is a snack-bar. This was considered the Number One need by students at a number of universities surveyed by the joint student-faculty committee.

Another item considered of importance and which is included in the planning of the student center is a ballroom. Such a facility will not only be used for student dances and other social events including large dinners, but also as an auditorium for moderate-sized student gatherings.

Christmas Means Renewal

Christmas is a time of renewal and recreation. It is the season during which we celebrate the birth of Jesus Christ, son of man and son of God.

Most of us do, in fact, celebrate the occasion in some fashion. All of us need to be more zealous, perhaps, in our efforts to do it in the right spirit. The poet spoke truly when he said, "Hope springs eternal in the human breast." This hope within us is akin to the divine.

Jesus came to earth as the embodiment of new beginnings, of hope, and of an ideal for man to follow to achieve to the utmost the best that is within him.

It behooves us, therefore, to approach the season in the spirit of beginning anew. It is the time of year when we can take stock of ourselves, our shortcomings and our potentialities. In other words, it is a good time for us to resolve to put forth the best that is within us.

This we can do if we follow the guide rules Jesus set for us. Let us be reverent toward God and love our neighbors as ourselves.

Maurice Carroll In Panama As Peace Corps Volunteer

Maurice L. Carroll, son of Mr. and Mrs. Sam Carroll, Route 2, Obion, is one of 36 Peace Corps Volunteers who left November 8 for Panama.

They will work in a rural community development and agricultural cooperative program. Approximately 75 volunteers are now serving in Panama in agricultural extension,

organize 4-H Clubs and community centers, and engage in other activities that will encourage the villagers to embark on self-help projects.

The group studied for 10 weeks at the University of Arizona, where heavy emphasis was placed on learning Spanish. Trainees received instruction in agriculture, nutrition, health, as well as United States and Panamanian history and world affairs. They received a month of training at the Peace Corps camp in Puerto Rico. Volunteers who will work in co-operatives received an additional week of field training in Puerto Rico.

The departing Volunteers will join almost 10,000 other Americans now working for the Peace Corps in 46 African, Asian and Latin American nations. Requests for additional Volunteers are received daily from these countries. More than 5,000 Volunteers were trained this summer and fall.

Ellen Webb Wins \$500 Scholarship

Miss Sara Ellen Webb, a senior in secondary education at The University of Tennessee Martin Branch, was awarded a \$500 scholarship yesterday by the General Alumni Association of The University of Tennessee.

Only three or four of these scholarships were given to former alumni scholarship winners. She was awarded an alumni scholarship in her freshman year.

The selection was based on scholarship and over-all progress. Miss Webb is an honor roll student. Her home is Palmersville.

MAURICE L. CARROLL

rural community action, and health projects.

Some of this new group of Volunteers will help organize cooperatives. Marketing co-ops will enable Panamanian farmers to increase the profits from the sale of their crops. Consumer co-ops will make goods and foodstuffs available at more equitable prices. In addition, saving and loan co-operatives will be formed to allow the pooling of local resources.

The rest of the volunteers will work in rural community development. They will inoculate cattle, build roads and sewage systems, teach first aid, sanitation and child care,

Let's Carry Our Share

Dr. James Key Teaches Course Here On 'The New Mathematics'

Dr. James F. Key, assistant professor of mathematics at The University of Tennessee Martin Branch, has been engaged in the teaching of a new course, Mathematics 211, which is the new mathematics for elementary teachers.

This is the first time this course has been offered in this section of the state. It is specifically designed to meet the needs of elementary teachers in the terms of the "new mathematics."

"Contrary to what some people think, the new mathematics is not concerned with newly-created mathematics," Dr. Key says in explaining the subject. "Most of the topics in the new mathematics have been known and used for centuries. The concept of a 'set' is perhaps as old as the use of the language itself. Most of what is taught in the new mathematics is the same as that taught by the old, or traditional, mathematics. There is, however, one all-pervading difference - there are 'new directions' in the teaching of mathematics. And it is this particular aspect, more than any other, which characterizes the so-called new, or modern, mathematics."

The teaching of traditional mathematics emphasized such things as mathematical competence, drill, power, and 'get the answer.' The student often found it necessary to memorize much of his mathematics, particularly the rules and patterns of procedure in the solution of problems. Too often the student found that when the problem was changed slightly, he could not arrive at the answer. He was well versed in many of the short cuts to problem solving, but he did not know how to solve problems where the short cuts he had learned did not apply. The result was that the student lost interest and motivation, became confused and frustrated, and finally formed a mental block to learning mathematics, physics, and engineering, Dr. Key states.

"In traditional mathematics, the teacher places much emphasis upon classroom drill," according to Dr. Key. "The student is expected to work through dozens of examples in hopes that he would remember the particular pattern or procedure for solving a specific type of mathematics problem and mathematics in general. Experience, however, has shown that this approach to teaching, which, incidentally, dates from antiquity, has been responsible for killing, intellectually speaking, the minds of countless thousands of young people. Essentially, this approach to teaching assumes that students will learn to think correctly for themselves."

In the new mathematics, on the other hand, a change in emphasis is advocated, which is away from so much memory work and drill and toward understanding and insight, Dr. Key says. Where traditional mathematics has placed emphasis upon problem solving ability as the end of mathematics instruction, the new mathematics still uses problem solving, but only as a "means" to the new end, which is "logical thinking." This new approach to teaching mathematics suggests that it is more important to know "how to think" than it is to know what to think about. In other words, facts are important; problem solving is important; drill is important; but the aspect which is most important is understanding "why" one does a certain thing at a particular step in the process of problem solving.

"If an educated person is one who can solve most of his life's problems for himself, then the new mathematics is certainly extending a better opportunity to become educated than did the traditional approach," Dr. Key emphasizes. "Logical thinking is not taken for granted in the new mathematics; rather, it is taught as a way of thinking from the first grade. Mathematics instruction at every level in the schools should be dedicated toward helping the student learn to think logically. Emphasis must be

Jenny Ladd Wins \$250 For Research

Jenny Ladd, sophomore in liberal arts at The University of Tennessee Martin Branch, has been awarded a research scholarship of \$250 by the Nopoco Chemical Company in Newark, New Jersey.

Jenny is presently working with Pat Drake on a project in the field of azo dye chemistry begun by Charles Harding, George Shankle and Robert Donnell. The project is under the direction of Dr. Carl Wasmuth, assistant professor of physical sciences.

Jenny received the award in recognition of a spectral study of sodium formaldehyde sulfoxylate solutions that she carried out in collaboration with Charles Harding last year. They presented a paper based on this work at the April meeting of the Tennessee Academy of Science, Collegiate Division, Western Region, at Memphis State University.

Next quarter some students who have had one quarter of organic chemistry or quantitative analysis may do research experiments instead of regular laboratory work.

upon the understanding of mathematical concepts and rules as these relate to the solution of problems and, more specifically, to insightful and creative mathematical thought."

Large-scale experiments in teaching mathematics by this new approach have been conducted at all levels within the nation's schools, Dr. Key says. Results from these studies show that the students have far greater interest and motivation because they are challenged, not to memorize, but to "think."

There is also an evening course for instructing teachers being offered at UTMB, Mathematics 211E, which is for training elementary teachers in this new mathematics.

A later issue of The Volette will contain a more detailed explanation of this new mathematics.

One UTMB'er Takes Peace Corps Test

One student at the University of Tennessee Martin Branch was among the group who took the qualifying test for the Peace Corps on campus Friday afternoon, November 27.

Gary Douglas and a number of others from Memphis, Halls, Grand Junction and Newbern took the two hour test. Henry C. Allison, registrar, administered the test for the Peace Corps.

The test will be administered again February 26 and April 30, 1965. Persons interested in taking the Peace Corps test should see Mr. Allison at his office on the first floor of the Administration Building.

Three Professors Attend Tax Clinic

Professors Howard E. Jones, Wesley O. Fortner and Wilbur Washburn attended the Eighteenth Annual Federal Tax Clinic held on The University of Alabama campus, November 20-21.

Tom Copeland, representing Argo-Collier truck lines, also attended the clinic. About 246 people from throughout the country were present.

The clinic was sponsored jointly by The University of Alabama, the Alabama Society of Certified Public Accountants and the Alabama Bar Association.

Speakers from various parts of the country spoke to the clinic on changes in the 1964 income tax and how the changes in the tax laws affect individuals and corporations.

Shirley Raines, left, receives roses after being crowned Engineers' Queen by Martha Lee Woods, last year's queen, assisted by Edgar Yandell.

Miss Raines Named Engineers' Queen

Shirley Raines was crowned Engineers' Queen Friday, November 20, at the National Guard Armory.

Miss Raines was selected queen from nine nominees by the engineering students. She was crowned during the intermission by last year's queen, Martha Lee Woods.

Miss Raines is a sophomore in home economics and is the daughter of Mr. and Mrs. J.A. Raines of Bells.

Pikes Play Santa To Needy Children

Pi Kappa Alpha will entertain approximately 30 underprivileged elementary students from Martin Saturday afternoon, December 12, from 1 to 5 at the fraternity house.

The Pikes and the pledges will spend the afternoon playing with the children and probably playing with the toys they present to them, said David Duncan, chapter reporter. During the afternoon punch and cookies will be served.

The party was held for the first time last Christmas and due to its success, the fraternity has decided to make it an annual affair, Duncan concluded.

Milan And Peabody High Schools Win Top Places In Band Contest

Milan High School and Peabody High at Trenton won the top spots in the annual Band Day activities at The University of Tennessee Martin Branch, November 21.

Glenn R. Wiesner, UTMB band director, was in charge of the program.

Milan band, under the direction of Charles Cobb, was awarded \$75 and a trophy for placing first in the Class A competition; Byars Hall of Covington, under the direction of Russell Phelps, placed second and was awarded \$40 and a trophy; Union City, under the direction of Marion Reithel, placed third and was awarded \$25 and a trophy.

Peabody High at Trenton, under the direction of Don Jenkins, placed first in the Class B competition and was awarded \$75 and a trophy; Central at Bruceton, under the direction of Miss Margaret Jenkins, placed second and was awarded \$40 and a trophy; Decaturville, under the direction of James Ward Evans, placed third and was awarded \$25 and a trophy.

Miss Annette Bizwell of Fulton County High School, Hickman, Kentucky, won first place in the Band Queen contest.

Miss Sally Ann Hrymak of Milan was first maid and Suzanne Marie Peacock of Central at Bolivar was second maid. Ten bands with their queens

participated in the downtown parade in Martin. The winners were announced later at the football game.

District Workshop Held November 21

Representatives from Home Economics Chapters of Lambuth College and Freed-Hardeman College attended the West Tennessee District Workshop held on campus November 21.

The workshop, planned by the Home Economics Chapter at The University of Tennessee Martin Branch, consisted of a speaker, discussion groups and summary reports.

The guest speaker for the event was Miss Lawanna Walker, a graduate of UTMB and now home economist for the National Cotton Council.

A luncheon at the Biltmore concluded the workshop. Approximately 40 students attended the district workshop.

ISA Will Have Meeting

Tuesday Evening Dec. 8

The Independent Student Association will have a meeting Tuesday night, December 8, at 7 p.m. in Room 204 of the Engineering-Physical Science Building.

Col. William Slayden Tells ROTC Here They Will Reap Advantage

Colonel William M. Slayden, II, representing the Military Department of The University of Tennessee, Knoxville, told the advanced section of ROTC December 1 that they were receiving an advantage over cadets from other colleges and universities.

Colonel Slayden stressed the fact that they will already be commissioned and will be leaders in cadet leadership posi-

tions because for three years they held positions as sophomores, juniors and seniors. He stated that cadets from larger established programs would not get this opportunity.

Also accompanying him was Lieutenant Colonel R.A. Perkins, chief of instructions at U-T Knoxville.

Alexander Heads Baptist Freshmen

Larry Alexander, a freshman in liberal arts from Martin, has been elected president of the freshman council of the Baptist Student Union.

Other officers elected who will serve during the month of January are Jim McCullar, vice president; Cathy Rudd, secretary; Peggy Hayes, devotional; Linda Bullefin, music; Sharon Patterson, publicity; Ann Vick, student center.

Barbara Newsome, mission; Pat Murphy, social; Wayne Ford and Wanda Coleman, enlistment, and Nancy Snow, YWA.

Phi Sigs Sell Bulbs For Christmas Baskets

Actives and pledges of Phi Sigma Kappa Fraternity sold light bulbs in Martin November 21 for the chapter's charity fund which will be used to buy baskets of food for needy families in Weakley County for Christmas.

This is an annual service done by the fraternity, and the balance of the fund will be distributed among various charities throughout the school year.

Tom Dial Elected Head Phi Sig Fraternity

Tom Dial has been elected president of Phi Sigma Kappa for the coming year.

Other officers elected are Larry Alexander, vice president; Edgar Yandell, secretary; Jerry Thorne, treasurer; Tom Litton, sentinel; John Christian, inductor; Bill Springer, pledge trainer, and Bill Moody, assistant pledge trainer.

Freshmen Sponsor Dance At Armory December 4

The Freshman Dance will be held December 4, 1964, at the Martin National Guard Armory.

The dance is semiformal and is closed to freshmen and their dates.

Music for the dance will be furnished by the Majestics and the time of the dance is 8 p.m.

Ronnie Armstrong (20) heads for the goal in game with Southeast Missouri Tuesday night. The Semo's won 71 to 55. Donald

Glover (12) may not be running interference but he's headed goalward, too.

Vols To Meet Blue Raiders In Basketball Tilt Tonight

The University of Tennessee Martin Branch basketball team will meet the Blue Raiders of Middle Tennessee State College tonight in the New Fieldhouse at 7:30 in what will be the first of a series of meetings between the two institutions.

Ranked high among small-college basketball, the Raiders' basketball team has now been placed in the university division, according to press polls. They will provide a supreme test for the Vols' second court contest of the season.

UTMB's seven returning lettermen will be facing three starters who stand 6-5 or over and will be threatened by even taller depth from Middle Tennessee State's bench. Probable starters for the Vols will be uncertain until game time. Moore Landers, 6-5 forward, 6-2 Don

Glover, or 6-1 Jerry Lacy will be facing MTSC's 6-6 and 6-5 forwards Mike Milholland and Jim Spencer. Joe Pollock, 6-5, or 6-6 UTMB center Wally Hoffman will have to contend with 6-7 Raider Ray Kempf. Ronnie Armstrong, 6-2, Johnny Williams, 6-0, or Jerry Combest, 6-2, will be working

against 6-3 visitor Bill Martin, and Dan Midgett, 6-2, at the guard positions.

UTMB tutor Floyd Burdette said that, according to scouting reports of the Raiders' scrimmages, the five listed above apparently work well and have been doing so since the start of the season. Their meeting with UTMB will be MTSC's opener and much excitement is indicated for fans.

On Monday and Wednesday nights of next week, the Vols will host Lambuth College and Austin Peay respectively, with game time set at 7:30 p.m.

Semo's Beat Vols In Season Opener

Southeast Missouri State's Indians continued their domination over the young series with The University of Tennessee Martin Branch Volunteers by scoring a 71-55 victory over the Vols in the two teams' season opener.

The Vols got off to a slow start in the first half due to inaccuracy from the field as well as superior SEMO rebounding. They came back in the second half facing a 34-18 deficit, but equalled the Indians in scoring by 37 points.

Forward Mike Gross, who led the Indians to their fourth straight conference championship last season, led both teams by pumping in 19 points. Vol forward Dave Small and SEMO forward Tom Drexler were next with 14 points.

In other scoring, forward Moore Landers took 12, guards Johnny Williams and Ronnie Armstrong, 11 and 7; forward Jerry Lacy, 6; guard Jerry Combest, 3, and forward Don Glover and center Joe Pollock both had one.

INTRAMURALS

By Terry Culvahouse

Tournament 'B' was completed with Green freshmen defeating Orange in a real exciting final match. There were 114 freshmen in this tournament. Red team had the largest number to participate with 21 members playing in the freshman tournament.

There are 15 women left in the freshmen table tennis tournament and 20 in the upper class tournament. Round Four ends Thursday, December 3 at 6 p.m.

The men are playing volleyball each day at 5 p.m. in the new Physical Education Building. Some real thrilling games are being played so men, be sure to support your team

As It Looks From Here

BY DAVID DUNCAN

Football has come to an end here at UTMB; and thus basketball has begun. With its beginning, a different style of athletics has entered the Vol realm, but that never-changing Tennessee Spirit should, and by all indications, will remain in abounding evidence.

This week the first two of a long series of contests take place, but before anyone can turn around, the entire season will be history. We must start now, as must the players, taking each game as it comes and gradually pushing onward to the tournaments, where everyone can practice what he has learned.

We cannot, however, completely forget the football season at this point. UTMB accumulated a rather deceiving record in comparison to performance on the field. The Vols out-gained opponents in rushing 1701 to 1312 yards and in total offense, 2334 to 2123 yards. Several boys deserve special attention for these achievements.

First of all, senior guard Chris Holbrook continually contributed to the lineplay of both offensive and defensive teams and led in total defensive points. Senior center Jerry Bethune, who has been for two years the mainstay on offense, was forced to play defensive ball almost constantly due to an in-

jury to captain Deslonde Collins and did a great job. Lorry Ruth, a junior guard playing under a great handicap, contributed much to the strength of the inner line. Tackle John Jenkins continually bolstered defensive tackle positions, as Wilton Marchman stood strong across the line on offense.

Ends Scott Boehringer, who caught 15 passes for 304 yards, Kenny Dickson, who caught eight for 175 yards and four touchdowns, and Jim Hammond, who produced continual strong protection on the defensive post combined to provide balance on the wing. Fullback Chuck Lewis led in rushing with 484 yards on 96 carries and a 4.9 average, Larry Shanks followed with 355 yards on 87 carries and a 3.8 average, and in third place was Garry Armstrong with 250 yards on 72 carries and a 3.5. All around Mack Moody should receive punt and kick-off return laurels for he returned 29 punts for 285 yards and 19 kick-offs for 414 yards.

In punting, freshman Steve Allison kicked 39 times for a 33.4 average, and in kick-offs Ron Lewellen boomed 26 for a good 50.9 average.

I'm sure that I've left out about twenty other boys who really put their heart into the cause of UTMB football, but space doesn't permit me to mention them.
